LETTER OF RECOMMENDATION

It is a delight to write a recommendation letter for one of the most promising students, **Mr. Gangam Saketh Ram**. I have known Saketh for three years during his graduation in my capacity of being a Professor in the Department of Computer Science and Engineering at BML Munjal University. This association provided me with ample opportunities to assay and analyze his skills. I find Saketh to be one of the most hardworking and dedicated students.

I first took note of Saketh during my lectures of **Fundamentals of Digital Logic** in the 3rd semester because of the enthusiasm and eagerness he showed for learning. He was among the active students of his class who always participated in the classroom discussions. Saketh received a lot of praise from me and my colleagues for his work on **LiFi Hotspots**, a project which he undertook during the **Microprocessor Based System Design** course. His innate ability to ask the right questions and conduct his own research not only helped facilitate discussions in the class but also reflected his potential for research.

I also took his lab sessions of 'Fundamentals of Digital Logic' and 'Microprocessor Based System Design', where he performed with utter keenness. I was impressed by his ability to relate the theoretical topics to its practical aspects. Given his pragmatic approach towards studies, his assignments were always well-researched and well-written. His presentations were a delightful affair given his soft skills along with his radiant confidence.

I believe, a student who has an eagerness in him to learn and is willing to the required amount of hard work is one of the best candidates. I wish him luck for his future and give him my highest recommendation for the M.S program being offered at your esteemed institution with adequate assistance.
