LETTER OF RECOMMENDATION

It is with great pleasure that I write this recommendation for Gangam Saketh Ram to support his application for the master's Program at your esteemed University. Saketh has been my student from September 2015 to August 2019 in the Computer Science and Engineering Department at BML Munjal University. During my period of association with him, I have taught him Discrete Structures & Computational Models, Computer Organization & Architecture and Distributed Systems. The interactions I have had with him in this regard have convinced me that he will excel at your University.

He is intelligent, intuitive and has displayed a keen interest in learning new techniques. Saketh has always been attentive in my classes, and he made sure he was actively engaged in class discussions and met deadlines. I have been most impressed by his ability to grasp each subject matter. Equally impressive is his ability to implicate the applications of the subject in a practical situation.

Saketh has keen interest in research. He closely worked with me as a research assistant for the Natural Language Processing project on Word Sense Disambiguation in context of Telugu language, during which he helped prepare the dataset for evaluation. Saketh displayed excellent communication skills as well. He has effectively presented and demonstrated his work in numerous assignment seminars. For his case study on Distributed Systems, he efficiently explained how facebook uses Distributed Systems Architecture for its daily operations.

Saketh is unquestionably an excellent fit for the MS Program. I believe his problem-solving approach will benefit him in a sustained period of post-graduate studies. His initiatives in my class alone proves that he will be a positive asset to your MS Program. I, therefore, wholeheartedly recommend Saketh.

If there is any need for further assistance from my end, please do not hesitate to contact me.

Satyendr Singh
