To the admission committee,

Writing to recommend Gangam Saketh Ram for admission to your university brings me a lot of happiness. I have been associated with him as a professor and project guide during his study at our college, which has given me a lot of time to interact with him and gauge his suitability for graduate studies. I am convinced that he has what it takes to excel in his academics and emerge as a game-changer in the field.

Saketh was among the most enthusiastic participants in my course on the Internet of Things. He not just took an active part in the classroom discussions but also paid rapt attention to the lectures. Moreover, he raised thought-provoking queries that elevated the level of discourse in the classroom. I also found him to be among the most industrious students I have taught. He was a quick learner who was inclined towards application-oriented learning. Further, he punctually submitted well-researched assignments. I got the opportunity to take note of his research potential when he built an innovative IoT project using LiFi as a medium. They went on to deliver a presentation on the functionality of the project by developing a model, which received rave reviews from me. He also did an excellent job of getting his findings published in the IEEE journal ("https://ieeexplore.ieee.org/document/8509085") and presenting it at Research in Intelligent and Computing in Engineering (RICE) conference as well. Saketh faced a plethora of challenges while executing the project but he persevered and made sure that the project was completed with stellar results and within the deadline. For this, he received much appreciation from the University.

I have also had the pleasure of supervising his work in the Internet of Things Lab, where he was one of the top performers. He not only performed the experiments with enthusiasm but also helped his peers, which is demonstrative of his ability to take initiative. He has also broadened his horizons by attending several workshops conducted by me. Because of all these positive attributes of his, it would be fair to say that he was one of our most treasured students.

Saketh came to our college as an enthusiastic learner and over time, he has evolved into a competent professional who can take on any challenge that the industry throws his way. I expect him to add immense value to your university and serve as a role model for his peers as well. I, therefore, wholeheartedly recommend him.

Regards,

18/10/19

Dr. Purnendu Pandey,
Assistant Professor,
Computer Science and Engineering Department,
School of Engineering and Technology,
BML Munjal University.
